Potential competing interests: No potential competing interests to declare.

The article is so long to be short communication and not fully meet the criteria of research article . The article needs a reduction

Comments:

1. Pages 1-3 must be reduced to two paragraphs or less.
2. The paragraph titled "Structure of measles virus" is not necessary and just one row is sufficient specially it contains incorrect sentences e.g.
 - P.4 "The MeV virion particle size is 15,894 kilobases (kb)"..... we have to clarify that 15,894Kb is the length of the viral RNA genome not particle size.
 - The title "History of Measles" contains many incorrect sentences e.g. Change "the MeV virus particle indicates" to "the MeV indicates"
 - The second paragraph is better to represent by phylogeny tree

The article needs a revision from editing office and summarize to the maximum possibility.

After the modification we can revise again
