

Review of: "Using the Altman Z-Score Model to Forecast the Financial Distress of a Subset of NIFTY 50 Companies in the Indian Stock Market"

Ismail Kalash

Potential competing interests: No potential competing interests to declare.

- The structure of article is not suitable and needs improvements.
- The contribution and the research gap of this article are not clear. The following question should be addressed.: what does the current research add to the existing literature?.
- Literature Review also needs improvement. Showing the role of the results of previous studies in developing the current research hypotheses can provide clear insights about the importance of this study and its results.
- The discussion of results is also very limited and still need substantial improvement.
