Potential competing interests: No potential competing interests to declare.

Please improve the discussion of the introduction by clearly explaining the research gap. This will also provide justification for the need/significance of your study.

Please state the specific objectives of your study. This will help you and guide your reader in the presentation of the findings.

Please improve the methodology by providing brief discussion about the research design used in the study. Please discuss the specific sampling technique used in the study. What criterion was used in choosing 55 respondents? Are they purposively selected? Is this a total enumeration of all facility managers in the five HEIs identified in the study? Please clarify. Also please discuss further the instrument used, was it adopted or researcher-made? How many items does it have? The discussion of Cronbach Alpha should be placed under the methods section i.e., validation of instrument. How were the data analyzed?

The discussion of results needs improvement.

Please include a conclusion by providing a brief discussion of the broader implication/s of your study. Thank you and all the best;-)
