

Review of: "Obesity, Dyslipidemia and other Risks Factors for Metabolic Syndrome among Indigenous Black African Secondary School Students in Lagos, Nigeria"

Birgul Vanizor Kural

Potential competing interests: No potential competing interests to declare.

Reviews:

1. Spelling errors must be corrected.
2. The aim explained in the abstract and in the introduction sections must be compatible with each other.
3. The tables mentioned in the article are expressed quite confusedly. It is difficult to follow and understand. Tables need to be simplified in line with the main aims.
4. BMI values should also be given in the tables.
5. BMI values should also have been given in the tables when classifications were made.
6. In the tables, statistical analysis values are given only according to the number of people, without giving parameter values (mean and SD). This makes it difficult to understand for the reader.
7. The manuscript is not original enough.

Manuscript is unacceptable to publication.

Best regards.
