

# Review of: "Unravelling the Phytochemical and Pharmacognosy Contour of Traditional Medicinal Plant: Pterocarpus Marsupium Roxb"

Rania Ahmed

Potential competing interests: No potential competing interests to declare.

The researchers succeeded in choosing the topic for the review.

The research is generally organized, written in good language, and includes all references used in the research in a correct manner.

But it is not enough for researchers to just review the information they found; rather, they must explain the importance of this information to the research topic.
