

Review of: "Cloud-based geospatial services for building capacity and safeguarding heritage in climatically marginal landscapes"

Navendu Chaudhary

Potential competing interests: No potential competing interests to declare.

The author's efforts are much appreciated. I am sure the article will help a wide body of researchers.

The article is clear and concise. It adequately explains the process. The methodology is worth publishing.

My only suggestion is to add a comparison to non-cloud-based solutions in order to lay emphasis on the advantages of the cloud-based solutions proposed.

I wish the authors well in their future endeavors.
