Potential competing interests: No potential competing interests to declare.

Well-written and informative article which has scientific merit. The authors have ensured that attention is drawn to the importance of HIV disclosure in the fight against HIV/AIDS in sub-Saharan Africa. However, kindly use the STROBES checklist to crosscheck all sections and to ensure that no important information is missing. Also, kindly mention the steps (if any) that the government employs to mitigate against stigmatization and to encourage HIV status disclosure.
