# Recombinant Tyrosinase-Related Protein-2

National Cancer Institute

## Source

National Cancer Institute. *Recombinant Tyrosinase-Related Protein-2*. NCI Thesaurus. Code C38682.

A recombinant therapeutic agent which is chemically identical to or similar to an endogenous non-mutated melanocyte differentiation antigen expressed by both normal and malignant melanocytes. Vaccinations with recombinant tyrosinase-related protein-2 may elicit an antitumoral cytotoxic T-cell response against tumor cells and some normal cells that express tyrosinase-related protein-2. (NCI04)
