

Review of: "Maintaining Sustainable, Affordable, and Low-Cost Housing for Middle- and Low-Income Classes in Uganda"

Emmanuel Kabund

Potential competing interests: No potential competing interests to declare.

The abstract does not have any findings of the research. What are the key words?

The research methodology needs to be expanded. What criteria were used to select the literature? What were the acceptance/rejection criteria? What databases were used? How was the search done...etc. Some facts stated, say in section 2, require supporting citations. Few citations appear to have been used. Was the literature review extensive?

There appears to be a big gap between the research methodology and the results. They just do not bond at all.

There is not so much that has been written in the article about housing sustainability. To include it as part of your research and to hardly write about it is not helpful.

There is no specialized literature on housing and housing affordability that has been cited in the article....how it is measured (standards used) and what the locally applicable standards are?
