Potential competing interests: No potential competing interests to declare.

Dear authors:

Firstly, it was not easy for these authors to do this work in Zimbabwe. Secondly, in Zimbabwe, this work is conducive to improving production and life and should be encouraged. Thirdly, the article lacks innovation and does not probe the mechanism deeply. Finally, considering the importance of the article results to this developing region, it is suggested that the article should be revised several rounds before publication.

The most important thing is to improve the logic of this article so that the readers can understand it better.

In the first round, since the quality of the paper needs to be improved, the common problems in this article should be revised, which are not listed here. Then, the authors should make revisions by referring to the marked PDF documents.
