Protein Farnesyltransferase/Geranylgeranyltransferase Type-1 Subunit Alpha

National Cancer Institute

Source

National Cancer Institute. *Protein Farnesyltransferase/Geranylgeranyltransferase Type-1 Subunit Alpha*. NCI Thesaurus. Code C38601.

Protein farnesyltransferase/geranylgeranyltransferase type-1 subunit alpha (379 aa, ~44 kDa) is encoded by the human FNTA gene. This protein is involved in protein prenylation.
