DPT/BCG/Measles/Serratia/Pneumococcus Vaccine

National Cancer Institute

Source

National Cancer Institute. *DPT/BCG/Measles/Serratia/Pneumococcus Vaccine*. NCI Thesaurus. Code C120213.

A proprietary lipid emulsion containing five vaccines: diphtheria, pertussis, tetanus (DPT), Bacille Calmette-Guerin (BCG), measles, *Serratia marcescens* and pneumococcal, with potential immunostimulating activity. Subcutaneous administration of the DPT/BCG/measles/*Serratia*/pneumococcus vaccine activates the immune system and may both abrogate tumor-induced immune tolerance and induce an antitumor immune response, which may eradicate the tumor.
