

# Review of: "Women In Slum Risking Their Safety To Access And Usage Of Basic Water And Sanitation Facilities"

Natercia Fernandes

Potential competing interests: No potential competing interests to declare.

- Has any study, of those included, shown the existence of a direct relationship between the increase in maternal mortality rates and the problem of poor environmental sanitation?
- Worsening menstrual symptoms means prolonging the days of menstruation? Increased menstrual blood volume? Increased pain during menstruation? What is the relationship between these menstrual symptoms and sanitation?
- It would be good to know the prevalence of diseases in women related to poor sanitation.
- Table 2 is missing the indicator "Lack of spaces for toilets".
- Some suggestions/recommendations are not specific and are not targeted. The suggestions/recommendations should be more specific, indicating the responsibilities for each.
- Do you think it is possible or feasible to guarantee police presence in bathrooms (taking into account the difficulties that exist in low-income countries)? Would the suggestion of community guards be enough?
- There is a lack of suggestions aimed at improving the education of men who, in this context, are the molesters of women.
