General Comments:

- Add another citation for the first sentence of paragraph 2 in the introduction section.
- Suggest changing the wording of paragraph 2 of the materials and methods section from "happened to observe" to something more technical.
- Good evidence for this species not being documented previously in Nagpur.
- All occurrences of *E. caudata* should be italicized (*E. caudata*).
- Do you have documentation of the plant species in the study area?

Overall, this is an interesting and important finding that should be reported in the literature.
