

Review of: "The use of tele-education in medicine, during and beyond the COVID-19 pandemic: A commentary"

Khaled M. Emara

Potential competing interests: No potential competing interests to declare.

titel	the authors did not show if it is just a review article or systematic review or personal opinion			
introduction	aim of the work need to be more clear			
M&M	the methodology used in data collection is not clear enough, more details are needed			
results	Is it a personal opinion or an outcome built on data analysis, the main question of teh study need to be clear, not just to say tele education is good.			
discussion	when the authors modify the paper the discussion will need rewriting
