Dear Editors,

Thanks for giving me this chance to review (Enhancing Corporate Cohesion with Ta'awun through Outdoor Activities for Senior Managers). I have a huge concern about this paper. Neither a strong theoretical foundation nor a comprehensive assessment of the literature supports the necessity of this paper. It seems to be a straightforward paper without taking any study methods into account. To make it easier for reviewers and readers to understand, it lacks headers and subheadings, as well as an introduction and an operational definition of variables. Additional research, particularly empirical research, is needed to bolster the significance of the subject and its business-related ramifications.
