# IL1RAPL1/DMD Fusion Gene

National Cancer Institute

## Source

National Cancer Institute. *IL1RAPL1/DMD Fusion Gene*. NCI Thesaurus. Code C99388.

A fusion gene that results from an Xp22.1-Xp21.3 microdeletion which causes a tail-to-tail fusion of the IL1RAPL1 gene and the DMD gene. This rearrangement is associated with Becker muscular dystrophy.
