Potential competing interests: No potential competing interests to declare.

The author presents a PaaS-based web service for food services using a cloud network. The topic considered is of current demand; however, the organization of the paper needs to be revised. The highlighted points after the introduction do not justify the article. The motivation behind this research work and the author's contributions are not mentioned.

There are some suggestions regarding the article:

1. Write full forms of the abbreviations that appear for the first time in the text, like URLs, HTTPs, and JSON.
2. Some lines are repeated in the Introduction section, like "Through digitalization strategies and food production innovation, stability and resilience of the country can be achieved."
3. The text in the introduction section is also written in another language, like "Model PaaS merupakan layanan cloud hemat biaya dan waktu yang memungkinkan developer fokus pada sisi kreatif penciptaan aplikasi."
4. There are many grammatical mistakes in the introduction and other sections of the paper.
5. A proofread is required for improvement. You need to give spaces, commas, and full stops properly.
6. Table 1 does not justify the data sources section.
7. The conclusion section needs to be restructured to be more explanatory and to match the title of the paper.
