Potential competing interests: No potential competing interests to declare.

The reviewer comments are as follows:

1. Although the research is interesting, results are not portrayed scientifically.
2. Flora of India Checklist and fascicles must be referred to when quoting the species details for authentic data.
3. Grammar corrections indicated.
4. Species descriptions should be given in taxonomical style as indicated in floras, instead of writing long sentences.
5. Purpose of study needs to be mentioned.
6. A photograph of an insect on flowers is required for such studies.

The manuscript can be accepted for publication after major review.
