Antibody-drug Conjugate SC-002

National Cancer Institute

Source

National Cancer Institute. *Antibody-drug Conjugate SC-002*. NCI Thesaurus. Code C123284.

An antibody-drug conjugate (ADC) composed of an as of yet publicly unknown monoclonal antibody against a tumor-associated antigen (TAA) linked to an as of yet undisclosed cytotoxic agent, with potential antineoplastic activity. Upon intravenous administration, the monoclonal antibody moiety of SC-002 targets and binds to the TAA expressed on tumor cells. Upon binding and internalization, the cytotoxic agent is released and kills the TAA-expressing cancer cells, through an as of yet unknown mechanism of action.
