Potential competing interests: No potential competing interests to declare.

1. The inclusion and Exclusion criteria for participants is not described in detail. Also what was the procedure to deal with drop outs or children who suffered severe malnutrition related disorders / symptoms during study period?
2. Dietary differences between households is not described or considered? What about non christians ? what diet did they followed.
3. No mention is made about packaged food or store bought ready to eat foods which are common finger foods amongst children?
4. Also it is important to include the social reasons of having more than two children for rural class? And was there a difference between number of children in rural and urban families?
5. How many low birth weight children actually turned wasted?
6. reasons for non vaccine complinace need to be briefed? was it distance to care centres or hospitals or lack of educaion?
