Dear Author,

The abstract does not give a perfect explanation of the identified problem and solution.

Chapter 1: Good

Chapter 2: Needs to work on a survey where such problems are solved with various solutions. The technical survey is missing, or researchable points are missing. Only schedules are given instead of a working methodology.

Chapter 3: The solution explained in this chapter is vague. It is not clearly explained (if possible, use flowcharts/ diagrams for communication). It is observed that all the terms in this paper are general instead of technical.

It is also observed that the solution in this article is non-technical.
