**Potential competing interests:** No potential competing interests to declare.

The work presents a systematic overview of the goals, difficulties, and commitment of the Nigerian government in implementing the UN 2030 Agenda. The authors' analysis of the situation shows that problems generated by COVID-19, corruption, among others, corroborate the possible future negative results of Nigerian sustainable development. Despite the negative results, the work is very useful for informing the community of what is happening in their country and what can be improved within the Agenda's goals.

I only suggest specific corrections:

pg 3, §3: space between "Agenda and 2030"

pg 33, §7: space between "7 and"

pg 18, §3: "Replace COVID-91 with COVID-19"
