**Potential competing interests:** No potential competing interests to declare.

1. In the abstract part, the novelty and key idea of the proposed method should be described.
2. In abstract, the result of this work must be described briefly with data. The result of this work is not clear. The authors only described the "a visualization plan of a home security system using motion sensors and gas sensors."
3. In the Introduction part, strong points of this proposed method should be further stated and organization of this whole paper is supposed to be provided in the end.
4. This is a making report. There is no comparison data. The reviewer fails to understand the effectiveness of this work.
