# Bispecific Antibody MDX447

National Cancer Institute

## Source

National Cancer Institute. *Bispecific Antibody MDX447*. NCI Thesaurus. Code C2207.

An antibody with potential antineoplastic activity. Specific for both the high-affinity immunoglobulin G (IgG) receptor CD64 and epidermal growth factor receptor (EGFR), bispecific antibody MDX447 may enhance cellular immune responses against EGFR positive cells, resulting in increased tumor cell lysis. (NCI04)
