Potential competing interests: No potential competing interests to declare.

The title is very interesting and novel in the respective region, especially about women entrepreneurs. Suggestions to improve further are as follows:

1. Abstract - please shorten it and don't report results in detail.
2. Please use the term "same" throughout the whole article. Ex: MSEs vs small-scale enterprise, business performance of women MSEs instead of business performance of women small-scale enterprises or women's business performance.
3. Please ensure that the research objectives, hypotheses, and conceptual framework use the same terms for IVs and DV.
4. Please edit H4 in section 4 (Communication and Communication Skills).
5. Please provide more detail in section 3.2.2, such as how many items for each variable, source, adapted/adopted, reliability from previous research.
6. Missing references for the in-text citations of Yamane (1967) and Israel (1992). Please check in-text citations and references.

With the above suggestions, the paper will be good and publishable.
