Milligram per 24 Hours

National Cancer Institute

Source

National Cancer Institute. *Milligram per 24 Hours*. NCI Thesaurus. Code C67399.

A unit of mass flow rate equivalent to the rate at which one thousandth of a gram of matter crosses a given surface or is delivered to a given object or space over a period of time equal to twenty four hours. Milligram per twenty four hours is also a dose administration rate unit equal to the rate at which one thousandth of a gram of a product is administered per unit of time equal to twenty four hours.
