## Suggestion 1. Let the name of "Castanha do Pará" be corrected by "Castanha do Amazonas".

The Brazil nut, popularly known as Brazil nut, and internationally as Brazil nut is a fruit from the chestnut tree *Bertholletia excelsa*. In Brazil, the plant focuses mainly on the states of Mato Grosso, Rondônia, Acre, Amazonas, Pará, Roraima, Amapá and Tocantins, being exploited since the first inhabitants of the Amazon. Due to the fact that it occurs in several locations, including outside the Brazilian territory, in 1992, during the 3rd World Convention on Dried Fruits, held in Manaus, its nomenclature was agreed as Castanha-da-Amazônia (Embrapa-RO, 2005).
