Potential competing interests: No potential competing interests to declare.

1. Rationale and design are not clear.
2. Authors should evaluate the biological investigation.
3. Docking can never give confirmation in a target-based study.
4. If authors prove activity based on docking, then they must perform MD simulation.
5. The graphical abstract is not clear.
6. Authors are suggested to report X-ray crystallographic data for confirmation of compounds.
