Potential competing interests: No potential competing interests to declare.

Paper is quite novel as it paves the foundation for upcoming research in the field of fins and tube heat exchangers. However, it can be further improved by including some relevant work done in the past.

Experiment findings are missing.

Conclusion part can be improved.

Abstract needs to be modified to make it more specific.

Results and discussion part needs to be modified to bring more clarity.

The paper can be accepted after considering the above comments.
