Potential competing interests: No potential competing interests to declare.

The topic is interesting since its study about manufacturing firm in Uganda. But following some suggestion you may consider to upgrade the quality of the paper:

1. Need to minor correction for grammar and sentences, i suggest to use professional proofread
2. Introduction should be more explore about the importance of Outsourcing as mediating role, not only for novelty purpose, but explain scientifically
3. Need more literature review about Outsourcing and Lean Manufacturing
4. Since the readers are coming from around the world, implication should describe more globally
