Review of: "Methodological Approach to Accuracy Assessment in CAD-CAM Mandibular Reconstruction"

Osayamen Igunma¹

1. Epidemiology, University of Alabama at Birmingham, United States

I enjoyed reading this article and think it has a high impact on dental practitioners aiming to use a CAD CAM. I like how the various steps and stages of operation were highlighted. I also like the idea that a patient case was presented to demonstrate the steps highlighted. Indeed, CAD-CAM is the future of dentistry. Thanks to the authors of this paper.
