Thank you for inviting me to review the manuscript entitled: Tobacco Smoking-Attributable Mortality in Kenya: 2012 – 2021

My main remark is that mortality during the Covid-19 period (2020-2021) must be analyzed separately and must appear in the abstract and the results.

My 2nd remark: we see that sometimes the results of this manuscript are in discordance with the literature. We must always try to find explanations.
