# BCR/ABL1 Fusion Gene with ABL1 NM\_005157.4:c.895G>C Mutation

National Cancer Institute

## Source

National Cancer Institute. *BCR/ABL1 Fusion Gene with ABL1 NM\_005157.4:c.895G>C Mutation*. NCI Thesaurus. Code C130213.

A fusion gene that results from a translocation t(9;22)(q34;q11) that fuses the 5' part of the BCR gene to the 5' side of exon 2 of a mutated form of the ABL1 gene. In this fusion gene there is a point mutation where guanine has been substituted with cytosine at nucleotide position 895 of the ABL1 gene. This mutation is associated with imatinib- and dasatinib-resistant leukemias.
