Potential competing interests: No potential competing interests to declare.

1. The author is monitoring using microcontroller, NodeMCU, and corresponding sensors.
2. Thing.io environment show the characteristics in the dashboard, but how it is alarmed to the user. As a suggestion, this red signal indication using sensor through Thing.io can be passed via app to the user.
3. Also how efficient is this system when compared to the existing system.
4. Further, the gap from the literature survey to the proposed work is missing.
