# Dissolution Controlled Extended Release Dosage Form

National Cancer Institute

## Source

National Cancer Institute. *Dissolution Controlled Extended Release Dosage Form*. NCI Thesaurus. Code C42741.

A solid, semi-solid, solution or suspension composed of active and/or inert ingredient(s) covered with or contained within a polymeric matrix such that dissolution is determined by the solubility rate of the given polymer. It is designed to release ingredients at a controlled, prolonged rate so as to reduce dosing frequency.
