I reviewed the titled "Decoding the Promiscuous Activity of Bile Salt Hydrolase" manuscript as a referee.

The manuscript is carefully written, and the motivation for the research undertaken is well explained.

I think that this study is important. In order to increase the quality of the article and to offer a wider perspective to the readers,

I believe that it will contribute to the scientific literature and that it will be beneficial if published with the mini revision I mentioned below.

1. It is necessary to increase and update the number of references by adding some latest references. For this purpose, the following articles may be taken into consideration.

<https://doi.org/10.1016/j.poly.2021.115320>

<https://www.sciencedirect.com/science/article/abs/pii/S1386142513008469>

<https://link.springer.com/article/10.1007/s10904-012-9679-7>

<https://doi.org/10.1016/j.molstruc.2020.129435>

<https://doi.org/10.1107/S0108270106027880>

2. To correct grammatical errors, it should be read by someone with good English, and grammatical errors should be corrected.

By minor revision, I am of the opinion that the article can be suitable for publication in the "Qeios " journal.

Kind regards.
