Potential competing interests: No potential competing interests to declare.

The review is well written and contains comprehensive details, but some amendments are required.

Consistency in Units and Typographical Errors

- Ensure consistency in the expression of units throughout the manuscript.
- Correct typographical and punctuation errors.

Italicization of Genus-Species Names:

- Italicize genus-species names of plants throughout the body of work, including "Solanum nigrum," and all scientific plant names.

Italicization of "et al.":

- Italicize "et al." in all in-text references.

Introduction:

- Insert a space between "millennia" and "Solanum."
- Elaborate more on the use of plants as therapeutic agents, especially in traditional medicine.

Table 2:

- Correct the species name to "nigrum," not "Solanum nigrum."

Scientific Units Formatting:

- Ensure proper formatting of scientific units with a gap between the units and the figure.

Table 4:

- Correct "Llung and colon cancer" to "Lung and colon cancer" in line 3.

Phytochemical Structures:

- Ensure clarity and efficiency in presenting phytochemical structures.

Traditional Uses and Phytochemistry:

- Provide more information on the toxicity of solanine found in *Solanum nigrum*, including symptoms of poisoning.

Comparison with Conventional Medications:

- Include a comparison of commercial formulations of *Solanum nigrum* with conventional medications prescribed for the diseases indicated in Table 3.

Plagiarism Check:

- Perform a comprehensive plagiarism check before final publication.

Results and Discussion:

- Consider integrating the information from the Results and Discussion sections into other relevant sections for better coherence.

References:

- Ensure well-rephrased citations in the References section.

Authors should address these revisions before considering the manuscript for publication.
