Thank you for the opportunity to review this draft.

I tried to rewrite the Abstract and some paragraphs towards making it publishable. Also, I rewrote the title because the way the initial draft was worded, it was somewhat biased against the REDD-plus initiative. Otherwise, some rebuttal may be expected. Such a response would not bode well for the integrity of Qeios. Hence, that is why I had to rewrite parts of the draft as attached.

Be that as it may, the Chief Editor and team have the final decision. I recommend publication with major corrections.

Thank you,

John
