Tatlockia micdadei

National Cancer Institute

Source

National Cancer Institute. *Tatlockia micdadei*. NCI Thesaurus. Code C86817.

A species of aerobic, Gram negative, rod shaped bacteria in the phylum Proteobacteria. This species is motile, nonacid fast, nonencapsulated, nonfermentative, catalase positive. *T. micdadei* is pathogenic only in immunocompromised patients, due to the decrease in virulence factors in relation to other microorganisms of this genus, being the causative agent of Pittsburgh pneumonia.
