Potential competing interests: No potential competing interests to declare.

Abstract:

- The abstract provides an overview of the research, but the article should be grammatically revised.

Introduction:

- Lack of recent references and clarification of the aim of the study.

Materials and Methods:

- Location map of samples, if possible.
- Clarify the methodology in detail.
- Clarify the criteria used for selecting the bacterial isolates for characterization and identification.

Results and Discussion:

- Relations of bacteria and the water parameters
- Importance of bacteria in agriculture

Conclusion:

- The summary and conclusion part is written short; it is difficult to understand the outcome of the study.

-

References:

- Please review the references carefully in both the manuscript and the list.
