FNTB wt Allele

National Cancer Institute

Source

National Cancer Institute. *FNTB wt Allele*. NCI Thesaurus. Code C52033.

Human FNTB wild-type allele is located within 14q23-q24 and is approximately 76 kb in length. This allele, which encodes protein farnesyltransferase beta subunit protein, plays a role in the post-translational modification of certain proteins via the addition of a farnesyl group.
