RARA Dual Color Break-Apart Rearrangement Probe

National Cancer Institute

Source

National Cancer Institute. *RARA Dual Color Break-Apart Rearrangement Probe*. NCI Thesaurus. Code C120389.

A DNA FISH probe designed to detect chromosomal rearrangements involving the RARA gene region at chromosome 17q21.1. It is designed to differentially label the proximal and distal regions of RARA and can detect rearrangements between the RARA gene and any translocation partner.
