Potential competing interests: No potential competing interests to declare.

I believe that the evaluated manuscript cannot be published in its recent form due to several limitations:

1. Abstract is lacking; more keywords need to be added;
2. Scheme of glucosodiene administration to the patient is not properly described;
3. Biochemistry - missing clinical and biochemical information about specific mechanisms of enzymatic action;
4. Discussion needs to be rewritten; missing comparison to the classic therapeutic scheme;
5. Literature sources - the number of references in the literature is not sufficient; some statements require more literature support.
