The paper deals with a very interesting theme. I suggest the revisions below for the improvement of the manuscript:

- 1- The title should be shortened (case studies can be mentioned at the end of the title).
- 2- The research gap, novelty, and findings should be justified and clarified in the abstract.
- 3- The literature review is not well-organised, the author need to go beyond just enumerating what different authors did/found, to grouping/comparing/contrasting their findings.
- 4- The author should explain why these neighbourhoods in Tehran are selected?
- 5- In Figure 1, the selected areas should be defined on the map. Also, some of the tables seem to be unnecessary. It creates confusion for readers.
- 6- More recent references should be justified and incorporated.
