# International Unit of Vitamin A

National Cancer Institute

## Source

National Cancer Institute. *International Unit of Vitamin A*. NCI Thesaurus. Code C67374.

An arbitrary unit of measurement of the specific biological activity of vitamin A, defined by the International Conference for Unification of Formula as equal approximately to 0.30 micrograms of all-trans retinol or to 0.60 micrograms of the provitamin A, all-trans-beta-carotene.
