

# Review of: "Revitalizing Key Conditions and Integrated Watershed Management Approach to Sustain Water Availability and Agriculture in Semi-Arid Regions"

Eva A.Y. Houessou-Dossou

Potential competing interests: No potential competing interests to declare.

The author was punctilious in describing the state-of-the-art of water supply and management in semi-arid regions, with a focus on African sub-Saharan regions where the situation is more severe. He also effectively examined previous work on IWSM implementation, revealing the barriers to IWSM success. Furthermore, I admire his writing skills and usage of good grammar. I am really impressed with the work that has been done here and strongly recommend that this study be published.
