Potential competing interests: No potential competing interests to declare.

Abstract: It is suggested to include the most notable results, how the data were analyzed, and the conclusion.

Methodology: Explain how the statistical analysis of the data was carried out.

Findings: Graphically represent the positive trend between 2013 and 2017 in the ELB in India mentioned in the article.

It should be noted that, in general, greater ELB is observed in women than in men.

Discussion: Compare with ELB from other countries in the region and the world.

Incorporate bibliographic references into the discussion.

References: They refer to problems in adolescence and not to ELB.
