

Review of: "Expansion of the antifungal activities through in silico docking study of compounds from Albizia lebbeck fruits"

Ravi Bansal¹

¹ Devi Ahilya Vishwavidyalaya

Potential competing interests: No potential competing interests to declare.

The authors must explain the following:

1. Why isolation of the process of the compounds from Albizia Lebbeck is not given
2. Criteria for choice of protein PDB structures.
3. How the mode of action of the observed experimental activity is related to the choice of docked protein structures.
4. Why docking validation is missing in the text?
5. Can you explain the procedure for protein preparation?
