

Peer Review

Review of: "Role of Inflammation in the Pathogenesis of Anemia in Chronic Kidney Disease: Exploring the Impact of Inflammatory Biomarkers on Erythropoiesis and Erythropoietin Response"

Mohanad Y. Al-Radeef¹

1. Clinical Pharmacy Dept., Tikrit University, Iraq

1. Revision of the title is required, focusing on the main topics of this study.
2. Keywords are required.
3. Please specify the method of sample size calculation or simply demonstrate the reason for including only 120 patients in this study.
4. More information regarding the methods of measuring study parameters is required.
5. Please specify the manufacturer and country of origin of each kit that was used to measure the study parameters.
6. Also, more information regarding EPO therapy that was used in this study is required.
7. Please omit the first paragraph of the results section.
8. Please specify how many participants were enrolled in each group.
9. Revision of the Discussion section is highly required. Please enhance the discussion with comparative studies (with similar or different findings as compared with the findings of this study). The results of this study should be compared with other studies in the literature, and authors should interpret their results by using arguments based on previously known literature.
10. Revision of the conclusion is required, focusing on answering the question of the present study only.
11. Any limitations of the study should be clearly stated at the end of the Discussion section.

12. More recent and updated references are required.
13. Reference 1 is duplicated with reference 8.
14. Reference 2 is duplicated with reference 9.
15. Reference 3 is duplicated with reference 10.
16. English proficiency is highly recommended (focusing on punctuation and grammar).
